

The STEM Equity Pipeline Presents

Resources for Professional Development with STEM Educators

Wednesday, September 22, 2010, 9am-3pm

Granite State College, Concord Center, Room 103

8 Old Suncook Road, Concord, NH 03301

Build Your Staff Training and Development Skills

The STEM Equity Pipeline has created a multitude of resources for professional development providers to use when training teachers interested in increasing the access and success of women and girls in science, technology, engineering and math programs of study at the secondary and postsecondary level. Join us for a day of discovery and sharing as you explore these FREE staff development resources.

Learn about:

- Five Step Program Improvement Process Training - a data driven decision making process for use with school site teams wanting to implement research-based gender equity in STEM strategies. The training resources include a guidebook, training exercises, power points and handouts.
- Research Literature Review – Nontraditional Career Preparation: Root Causes and Strategies is a distillation of the last 15 years of research on gender equity in education and career development. In both print and online versions this tool is the cornerstone of the STEM Equity Pipeline's training.
- Online webinars- on everything from the Status of Women and Girls in STEM to the Effects of Stereotype Threat on Girls Performance in STEM, these webinars are a great learning tool on their own or as support to other professional development.
- Workshop toolkits – that include power points, presenters notes, handouts and workshop exercises ready for you to use today.
- Website resource data base – loaded with links to effective practices, videos, posters, and other materials.

SHARE YOUR FAVORITE TRAINING RESOURCE OR STRATEGY – part of the day's agenda will include time for participants to share their expertise and favorite resources. Please indicate on your registration that you have something to share. You will have approximately 10 minutes to share with the group.

The day will be facilitated by Mimi Lufkin, CEO of the National Alliance for Partnerships in Equity Education Foundation and PI of the STEM Equity Pipeline.

Registration is free but space is limited
