

What is BrowseAloud?

BrowseAloud is free software that reads web pages out loud. It can help anyone who has difficulty reading on-line, including people with mild visual impairments, low literacy, English as a second language, or learning disabilities, such as dyslexia.

Once you have BrowseAloud installed on your computer, all you need to do is hover your cursor over a selection of text. BrowseAloud will highlight the words and read them out loud.

How do I install BrowseAloud?

You can download BrowseAloud from the BrowseAloud web site:

- [Browsealoud Downloads](#)

Follow the instructions on download page to install BrowseAloud on your computer.

Where can I get more information or help?
